

Product Backlog Items

There are many different kind of items that you can add to a product backlog

- User Story
- Use Cases
- Bugs, Errors, Fixes
- Constraints
- Tasks

User Stories

A user story is expected behaviour of the product from a user perspective

- break down functionality based on requirements

As a user I want to be able to login **so that** I can view my account.

Given a user is on the login page **when** they enter their account credentials **and** hit the login button **then** they are directed to their account page

Epics

Epics are a collection of user stories
